

# Riku WG156 (HB-Nr.: 10.204852)

Wagyu Genetics EN / Genetics sale / Wagyu semen / Riku WG156 (HB-Nr.: 10.204852)

## Basic data:

**Ancestry:** BSW Okufuji 9  
x MAR Eileen 186D

**Comments:** Purebred bull  
Homozygous polled

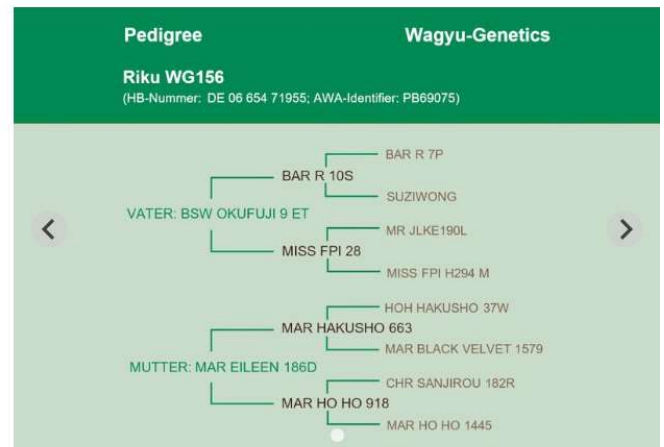

**Price:** 95 € (net plus VAT)

## Description:

Riku WG156 is a young homozygous hornless bull that has a very interesting pedigree. It is genetically far enough away from the hornless bulls available on the market so far.

His sire is the winning Wagyu Purebred at the 2018 National Stock Show in Denver - this suggests his exterior is also good in Riku WG156. His pedigree also includes such well-known sires as Sanjirou, Kenhanafuji, Haruki 2 and Suzutani!

This new breeding bull is registered in the German as well as in the American herdbook.

## More facts:

- Free of all known genetic disorders
- Homozygous polled
- American Identifier: PB69075
